- Provides a cohesive description of the ecology, virulence, molecular biology, immunogenicity of oral bacteria, viruses, and fungi, and their interface with host cells and secretions
- Focuses on the microbiology and immunology of the oral cavity
- Describes the basic biology of the oral ecosystem, the types of organisms found in this habitat and modern experimental approaches to their study
- Discusses the means by which microorganisms can cause diseases such as caries or gum disease
- Documents the host immune responses to its oral community, along with means for dentists to achieve sterilization, disinfection, and asepsis.
