Effects of Taurolidine and Chlorhexidine on SaOS-2 Cells and Human Gingival Fibroblasts Grown on Implant Surfaces
Gordon John, Dr med dent/Jürgen Becker, Dr med dent/Frank Schwarz, Dr med dent

The featured article for this issue of JOMI evaluates the effect of antibacterial/disinfectant mouthwashes on cellular healing. With increasing emphasis on the management of inflammatory disease associated with dental implants, this article provides the reader with valuable information that could affect the material used in the preventive phase of ongoing care.
